St. Mary's County Science Fair AWARDEES Luncheon

Description: Late February 2010, members of INCOSE SoMD learned first-hand that innovation is alive and well in St. Mary's County. More importantly, county high school and middle school students were given an opportunity to challenge themselves in a friendly competition with their fellow county students in presenting their individual science and engineering projects. Why is this big deal? These young people are the future of our profession. Please come and show your support for our county youth by seeing the prize winning exhibits and talking with their creators. This should be a very interesting event! Mr. Pete Williams will be our guest speaker and the Master of Ceremonies.
